With the W Hotel Bank the exclusive hotel chain W has opened its second hotel in The Netherlands. The extension is housed in the former Kas Bank Building in the centre of Amsterdam. In the hotel's atrium, Octatube has realised the renewed glass roof structure and a glass bridge. In addition, at different floor monumental glass has been installed for the balustrades of the staircase and the cladding of the elevator shaft at different.

The new design respects the building monumental character and enhances it and transforms it into a public building in the city. The Bank-building houses 66 guestrooms and suites, a spa, bar, restaurant and a creative incubator concept space. Octatube's glass bridge and glass roof are situated directly above the monumental ceiling of restaurant The Duchess.
